PROFISSIONAL SUMMARY

Full Stack Developer with experience in software development, process automation, data analysis, and AI-powered solutions. Background includes software engineering, business operations management, and entrepreneurship across Brazil, Ireland, and the UAE.
Skilled in building scalable applications, REST APIs, automation workflows, and data-driven solutions that improve efficiency and support business growth. Passionate about technology, artificial intelligence, and solving real-world problems through software.

TECHNICAL SKILLS

Programming Languages
- Python
- Javascript

Frameworks & Libraries
- Django
- FastAPI

Tools
- Git / GitHub

Data & AI
- Data Analysis
- Automation
- Machine Learning

Web Technologies
- HTML5
- CSS3

Backend & APIs
- REST APIs
- JSON
- Data Processing

CERTIFICATIONS

- Backend Development with Python – DIO
- Python for Data Analysis and Automation – DIO
- Data Automation with AI – DIO

PROFESSIONAL EXPERIENCE

Freelance Data & Automation Specialist, Dubai Feb 2025 - Present
- Developed Python automation solutions that reduced manual reporting processes by up to 50%.
- Built data-processing workflows to extract insights from large datasets.
- Automated repetitive operational tasks, improving efficiency and accuracy.
- Transformed business requirements into scalable data-driven solutions.

Software Developer, CI&T, Campinas, Brazil 2015 - 2019
- Developed responsive web applications using JavaScript, HTML, and CSS.
- Implemented REST APIs to improve functionality and user experience.
- Collaborated with designers and backend developers to deliver high-quality software solutions.
- Refactored legacy codebases to improve performance, maintainability, and scalability.
- Delivered multiple projects within tight deadlines in a fast-paced environment.

Customer Service Manager, Mema's Restaurant and Bar, Dublin 2023 - 2025
- Managed daily operations and customer experience in a high-volume environment.
- Implemented operational improvements using digital tools and structured processes.
- Led teams and coordinated multiple priorities while maintaining service quality.
- Increased customer satisfaction through process optimization and problem-solving.

Digital Mentor & Entrepreneur, Online Business - Remote 2020 - 2022
- Managed CRM systems and customer engagement processes.
- Designed automated email workflows and customer communication strategies.
- Organized backend operations and analyzed performance metrics.
- Developed digital processes to improve customer experience and operational efficiency.

EDUCATION

Bachelor of Technology in Systems Analysis and Development
Fatec Arthur de Azevedo

São Paulo, Brazil | 2012 – 2016

Business Administration, Accounting & Finance
Independent College

Dublin, Ireland | 2024 – 2025

PROJECTS

Finance MVP AI (Python, FastAPI, AI)
- Built an AI-powered financial MVP designed to assist users with investment analysis and decision-making.
- Developed REST APIs and backend architecture using FastAPI.
- Integrated AI-driven features for financial insights and portfolio recommendations.
- Implemented asynchronous data processing and real-time information handling.

Web Application (Frontend + Backend)
- Developed responsive frontend interfaces and backend integrations.
- Built REST APIs for dynamic data management.
- Applied modular architecture and clean code principles.
- Improved maintainability and scalability through structured development practices.

ADDITIONAL INFORMATION

Languages: Portuguese (Native), English (Fluent), Spanish (Intermediate)
